### Market Potential in Iran for India

(i) Iran is a US\$ 3 billion market for Textiles & Clothing. Major countries who are supplying textile products to Iran are China, Korea, Germany, Turkey, India etc. India's market share is around 4% and hence the Iranian market offers substantial scope for Indian exporters.

(ii) The lifting of international trade sanctions on Iran has opened up vast opportunities for exports of Indian textiles products to Iran including yarns, fabrics, home textiles, garments, etc.

(iii) Iran has announced that it will resume import of fabrics from countries producing the best quality material.

(iv) There is good potential for trade with India in Raw materials like fibres and also Cotton and Poly Cotton Yarns.

(v) As Tehran is a trade centre, there is 'huge' export potential" in Iran.

(vi) Iran's GDP is expected to grow by 5pc in the next two years following the lifting of sanctions and exports of textiles to the Iranian market likely to increase in the near future.

(vii) Limited cotton production in Iran limits production of cotton textiles products like yarn, fabrics and home textiles, thereby, creating demand for imports of these items.

(viii) During the embargo period, no new investments were made especially in the weaving sector. Also the existing production plants have not been modernized. Therefore, there is a

gap in demand and supply in Iran particularly for dyed and patterned fabrics and home textiles.
