In 2009-10 export was down due to low oilseeds crop coupled with the disparity in crushing during Nov.'09 to Feb.'10, the main crushing and export season. However, 2010-11, oilseed crop had increased to 27.8 million tons from 24.9 million tons in 2009-10 and also high price of edible oils, good crushing margin and demand from S.E. Asia pushed the export mainly during Nov.'10 to Mar.'11 resulted in to substantial increase in export during 2010-11 over the previous year.
