

## TEXPROCESS WORKSHOP, 13 September 2017

Leading in both apparel consumption and exports, India holds the second largest textile manufacturing capacity globally with the textile machinery sector witnessing a growth of 8-10 percent year on year. Also as the world's second largest exporter of textiles and clothing, Indian apparel manufacturers are naturally moving towards increasing their manufacturing capacities and upgrading technology, giving rise to automation garmenting processes to enter the Indian market.

**Texprocess**, the leading international trade fair for processing of textiles and flexible materials, launches a Texprocess Pavilion at Techtexsil India in Mumbai held from 13<sup>th</sup> to 15<sup>th</sup> September 2017. Texprocess brings together the garment-manufacturing and textile processing industry from all around the world making it the leading fair for the sector. Held in conjunction with the Texprocess pavilion, is the Texprocess Workshop structured to address the most pressing issues faced by today's garmenting industry. It would bring together the attendees from garment manufacturing, textile & technical-textile processing, machinery and equipment manufacturers etc. to learn about the market outlook, trends, developments, opportunities & challenges in the industry.

Supported By

THE CLOTHING MANUFACTURERS ASSOCIATION OF INDIA
