TOPIC

## MAXILLARY FULL ARCH RESTORATIONS

### ➤ PROFILE

- Private practice. Special attention - Oral implantology,
- Visiting faculty: SDM College of Dental Sciences, Dharwad,
- Director: Impart Education, ACE Academy to nurture and guide motivated clinicians towards predictable, evidence based dental practice.
- Expert on DentalXP, the largest portal for online education in the world.
- Founder member: Indian Academy of Laser Dentistry.

Implant supported Restorations of the maxilla are more challenging than the mandible due to anatomical factors and the aesthetic demands. This presentation will analyse the difficulties in the surgical and restorative phase of full arch rehabilitation for the edentulous maxilla. Innovative solutions for immediate loading and provisional restorations will be discussed.

The presentation also includes 'Fast tracking technique' for brisk, error free conversion from provisional to definitive restoration.
