“Management of Aesthetics and function in Complex Situations with Implants”

Clinicians have to deal with situations demanding solutions for compromised bone situations, need for immediate Provisionals and more importantly an esthetic end result which can be maintained over a long period of time.

This presentation discusses such cases from treatment planning to execution and emphasizes the importance of key aspects that the clinician needs to understand and control during treatments of such cases.

He conducts lectures and workshops in the fields of Dental Implant therapy, Fixed Prosthodontics, Esthetic Dentistry, Practice Management and Interdisciplinary treatment modalities at forums worldwide.

In spite of his busy clinical practice, he has authored numerous scientific publications in national and international journals. He has authored the clinical textbook on esthetic dentistry titled 'ESTHETIC DENTISTRY – AN ARTIST'S SCIENCE' and had made a valuable contribution to chapter on 'Interdisciplinary Orthodontics' in first and second edition of the Clinical textbook 'CLINICAL ORTHODONTICS-CURRENT CONCEPTS, GOALS AND MECHANICS'
