He received his postgraduate training at the University Andres Bello with the degree of Master in Dentistry specializing in Periodontics and Implantology graduating in July 2005.

Currently, exercises in private practice and as Professor at the Faculty of Dentistry, University Andres Bello in the area of Periodontics and Implantology both Pre and Post graduate since 2003 and the Adult Integrated Preclinical Department at the University of Mayor.

Dr. Ferrer is an active member in the Academy of Osseointegration, Member of the Society of Periodontology and the Society for Prosthetics and Oral Rehabilitation of Chile.

For a long time it has been discussed about different ways to avoid dimensional changes at post extraction sockets. Through the philosophy of the Partial Extraction Therapies we will be able to analyse and plan our cases in a different and unique way not only in the aesthetic zone also in partial and full arch cases in a predictable and reproducible way .
