“TREATMENT PLAN – FULL MOUTH REHABILITATION WITH IMPLANTS”

This Presentation will focus on the treatment plan modalities for full mouth rehabilitation cases. Implants have long been used to rehabilitate patients with missing teeth. Implants Provide retention and stability for patients with complete dentures, with two implants thus improving their function. Now with more demand for fixed restorations and higher aesthetic demand it becomes critical to treatment plan cases with great precision. CBCT an Guided Implant technique do provide greater predictability. This presentation will focus on how you can handle different situations with great success.
