

CALL FOR CONFERENCE PAPERS AND PARTICIPATION

The Journal of Global Commerce Research Invites you to Participate in
The International Conference on Global Commerce and Sustainability

www.journalofglobalcommerceresearch.com

When: October 7-9, 2010

Where: The Grand Hyatt Hotel, Denver, Colorado USA.

The Global Commerce Forum cordially invites international academicians and practitioners specifically researchers, engineers, scientists architects, consultants, and policy-makers in universities, research institutes, business community, not for profit organizations and government agencies to participate in this exciting conference to discuss case studies, best practices , innovative ideas, leading edge concepts, new technologies and devices, ongoing R&D efforts, prototype and demonstration projects, commercialization technologies and projects, and visions of the future related to sustainability and global commerce.

The conference provides a unique opportunity for communication and collaboration among academia, industry and planners in the areas of Energy Efficiency, Renewable Energy, Advanced Energy Technologies and general business tools and issues among all different constituents. The conference will feature plenary and breakout sessions where senior business executives, not for profit organizations and government agencies including business agencies will discuss various issues pertaining to logistics, the environment, energy and sustainability. The conference is inviting papers, posters, abstracts, case studies and proposals from all disciplines (business, science and technology) for presentation and panel discussions from local and global scholars and practitioners, business, government, and nonprofit organizations worldwide. Accepted papers will be considered for the Best Paper Award and publication in the Journal of Global Commerce Research (www.journalofglobalcommerceresearch.com) or the Journal of Current Research in Global Business (<http://Regisfacultyonline.org/jcrgb>). Who Should Attend

This is a forum for academia, senior level executives and professionals in any industry and officials from national governments to share ideas and latest developments in all facets of local and global business and sustainability; Attendees include:

- Architectures and designers
- Attorneys and regulatory specialists
- Entrepreneurs, Innovators and developers
- Industry executives
- Investors and venture capitalists and social entrepreneurs
- Market analysts
- Federal, state, local government and national government policy makers and regulators
- Non-governmental organizations
- Researchers, engineers, environmental analysts, scientists, and biologists
- Scholars
- Shippers, port authorities, Logistics, transportation, supply chain companies
- Third and fourth party logistics, manufacturers, retailers and consultants

Why You Should Attend

1. **Quality and Solution orientation:** You will be exposed to high quality presentations of innovative real life case studies and current and future trends, and the changes and opportunities inherent in these changes from industry experts, business executives and researchers. As a business person, you will be exposed to proven strategies that you can immediately apply to your organization in addition to using the knowledge to assess the effectiveness of your organization's sustainability programs against the industry leaders, and effect positive change in your organization. As a researcher, you will have insight into the issues and opportunities facing the businesses that you can use as a basis for your research to solve real life problems or improve government policies.

2. **Diversity:** the conference draws attendees and presenters from all over the world with diverse topics allowing you to network and showcase your technologies and solutions possibly make new business partners abroad. The diversity of topics ensures that you do not have moments of boredom. The agenda is free of sales pitches. Instead it provides real solutions to attendees.
3. **Unique Experience:** This is the only conference that brings together representatives from academia, national governments, and business executives from all over the world to give you a unique perspective on contemporary business issues, research and technologies for the purpose of advancing sustainability through collaboration. You will view poster and conference papers on every conceivable business topics and advancement in technological innovations in logistics, fossil/renewable energy, environment and the tools for sustainability performance measures. You will have the opportunity to meet with not only your peers but with international practitioners and scholars.
4. **Networking and Value:** With dedicated networking time at the Forum – you will expand your network of international scholars and senior-level executives from top companies drawn worldwide. You will have the opportunity to come away with knowledge that you need to successfully commercialize a technology, run efficient operations while meeting the sustainability needs, know the market trends and the policy issues in at least the energy, logistics and environmental areas; all this under a relaxed and friendly atmosphere on account of the controlled size of the conference and the many networking opportunities offered to attendees allowing you to spend more time with those who peak your business interest.

Comments from previous attendees

"The Conference provided an excellent opportunity to network with important individuals, the presentations provided were extremely informative and I learned a lot!" Carol Barbeito, Ph.D., President, Earth Protect

"The conference provided an excellent opportunity to get exposed to the business and academic issues in the field. The topics discussed were current and relevant and the academic research provided interesting insights into the business."
Dinorah Frutos, Southern New Hampshire University

What I enjoyed most about the International Conference was the Intelligence of the presentations and the ease of networking among attendees"
Robert L. Candiotti, Founder and CEO, IvanpahValley.com
