# Still second guessing your Excel work?

Formulas work, but logic feels unclear  
Errors take too long to fix

Reports are hard to explain

**This 1 day hands on workshop helps you:**

- \* Design clearer formulas with better logic
- \* Use AI to troubleshoot and validate Excel errors
- \* Clean and structure data faster
- \* Analyze data confidently using PivotTables
- \* Explain results clearly to stakeholders
- \* Use AI responsibly without over dependence

# AI is not doing the work for you

It helps you think better

## Learn how to use tools like

- Microsoft Copilot
- ChatGPT
- Google Gemini

## To

- \* Break down Excel problems
- \* Explain formulas in plain English
- \* Validate logic and reduce mistakes
- \* Improve clarity and decision making

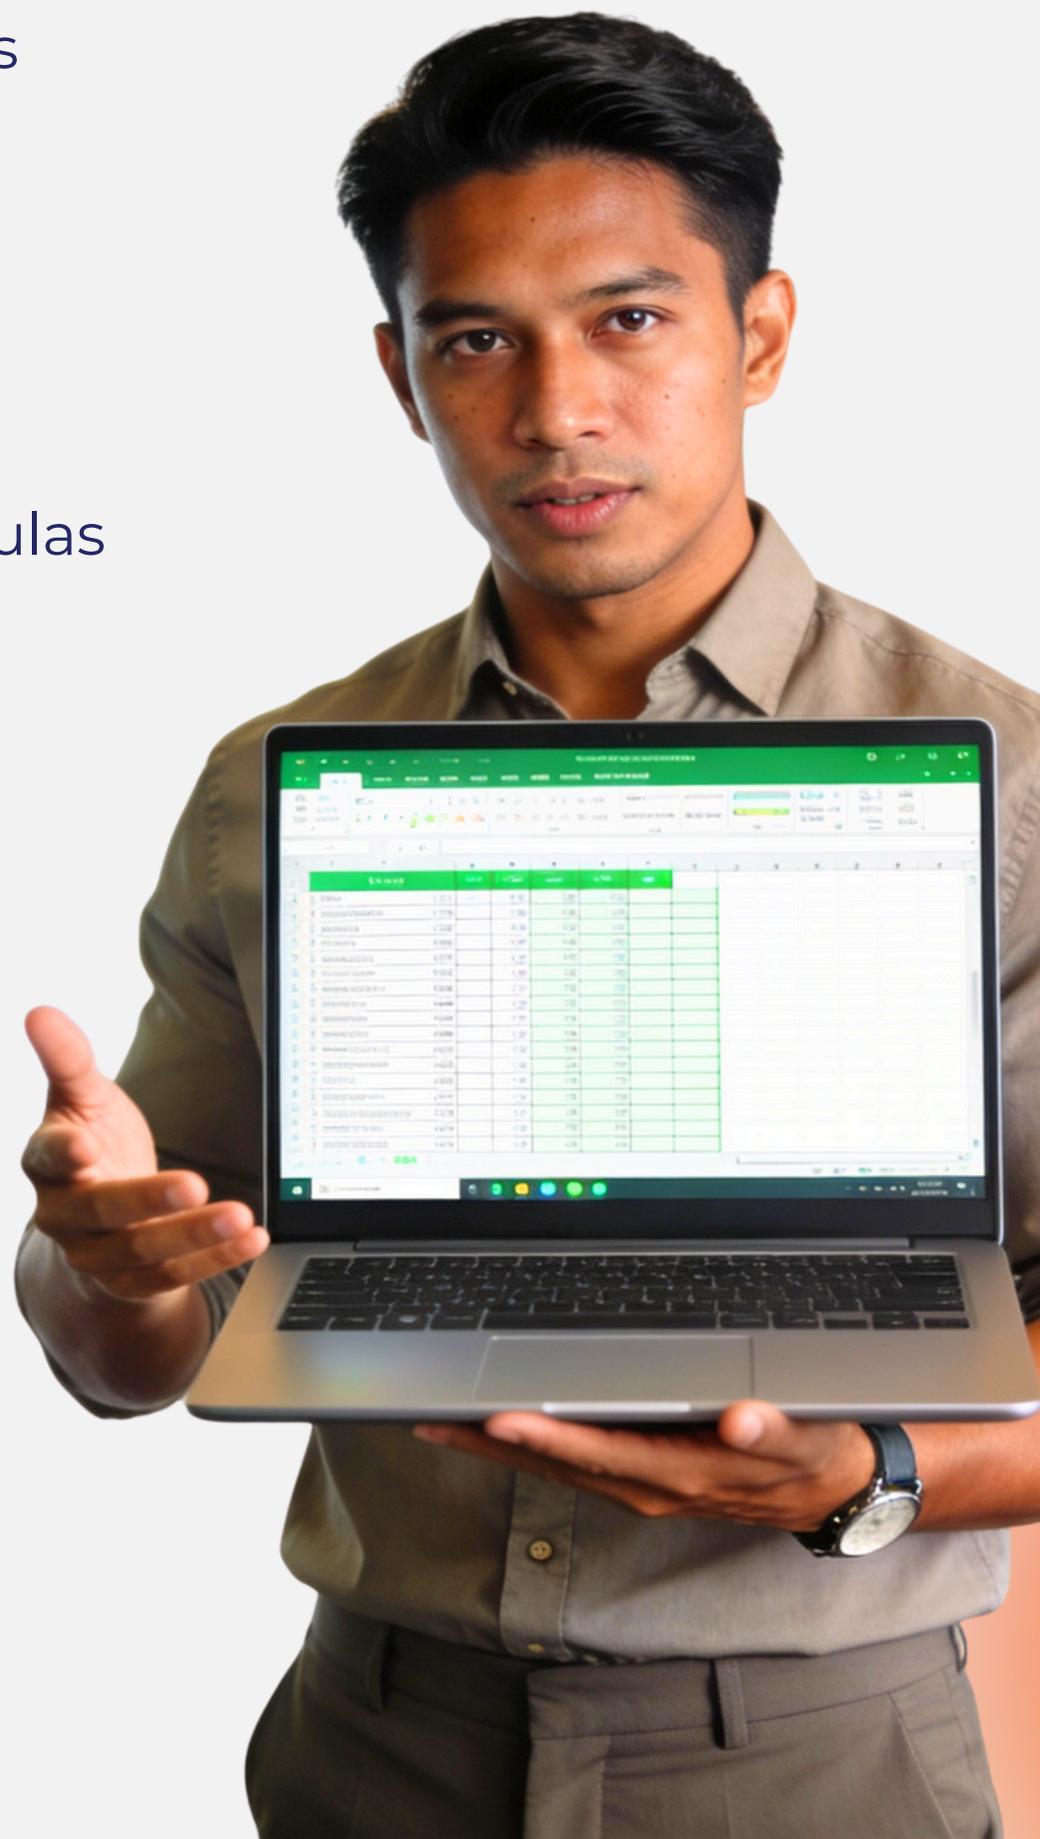

# Who This Is For

**Ideal for professionals  
who use Excel regularly**

- \* Admin and HR professionals
- \* Finance, operations, and reporting teams
- \* Executives and analysts
- \* Excel users who know formulas but struggle with logic
