FAQ

Why supplement with VMAlife?

VMAlife's Velixir is essentially an ultra-premium liquid health supplement. It is our body's answer for delicious, complete nutrition.

What does Velixir mean?

An elixir is a kind of herbal liquid commonly used to treat or heal illnesses. Likewise, Velixir is the result of our proprietary formula combined into a liquid supplement for the same purpose.

Is Velixir Halal?

Yes it is. Velixir is endorsed with the Halal certified seal.

What are Xanthones?

Xanthones are biologically active phytonutrients with very potent antioxidant properties.

What is Antioxidant?

Antioxidant is basically the body's defence system against free radicals. It acts as a stabilizing agent before the free radicals have a chance to attack healthy cells.

What are Free Radicals?

Free radicals are unstable molecules that remove electrons from a healthy cell, destroying it in the process, thus leading to premature ageing.

Where are Velixir's minerals sourced from?

Our bodies cannot function without minerals; however minerals cannot be synthesized and must come from Mother Nature. Velixir's minerals are sourced from the deep sea bed of pristine ocean waters, and which provides copious amounts of unprocessed phytonutrients.

FAQ

What are the 12 vitamins that are included in the formula?

Vitamin A

B Complex (B-1, B-2, B-3, B-5, B-6, B-7, B-9, B-12)

Vitamin C

Vitamin D3

Vitamin E

I am a diabetic. Is it safe for me to consume Velixir?

Yes it is. However, we recommend that you seek your healthcare professional's advice as every individual's requirements will vary.

What is the maximum amount of Velixir that can be consumed in a day?

It is recommended to take 1 sachet (50ml) of Velixir a day as it will already meet the daily nutritional intake. However, you may take up to 2 servings if so desired, or when recovering from an illness.

Can children consume Velixir?

Yes. As long as your children are able to consume solid food, then half the adult serving of Velixir will be beneficial to them.

Can pregnant or nursing women consume Velixir?

Yes, there are no herbal extracts in Velixir only vitamins, minerals, fruit and vegetable extracts. However, we recommend consulting a healthcare professional before consuming Velixir as each woman's body is different.

I have previously ordered Velixir but now it tastes different. Why?

The main ingredient in Velixir is mangosteen. From time to time, there may be seasonal fluctuations for the mangosteen harvest used. In addition, we have enhanced the contents by the addition of enzymes derived from vegetables. Enzymes do alter the taste somewhat. VMAlife does not use any artificial colours or flavours in their products.

Do I need to store Velixir sachets in the refrigerator?

No, it is not necessary as the sachets have an engineered barrier (foil and metalized film) to protect what's inside from moisture, heat, odour, and UV rays. Just store it in a cool, dry place.

WE BELIEVE...

... great health is your number one asset!

HI, I'M DR. ABRAHAM

I am the medical consultant and advisor for VMAlife which markets a product called *Velixir*.

This product quickly tops up what is missing in the body, and helps the body to fight the infection when they are taking treatment or even if they have a mild form of infection.

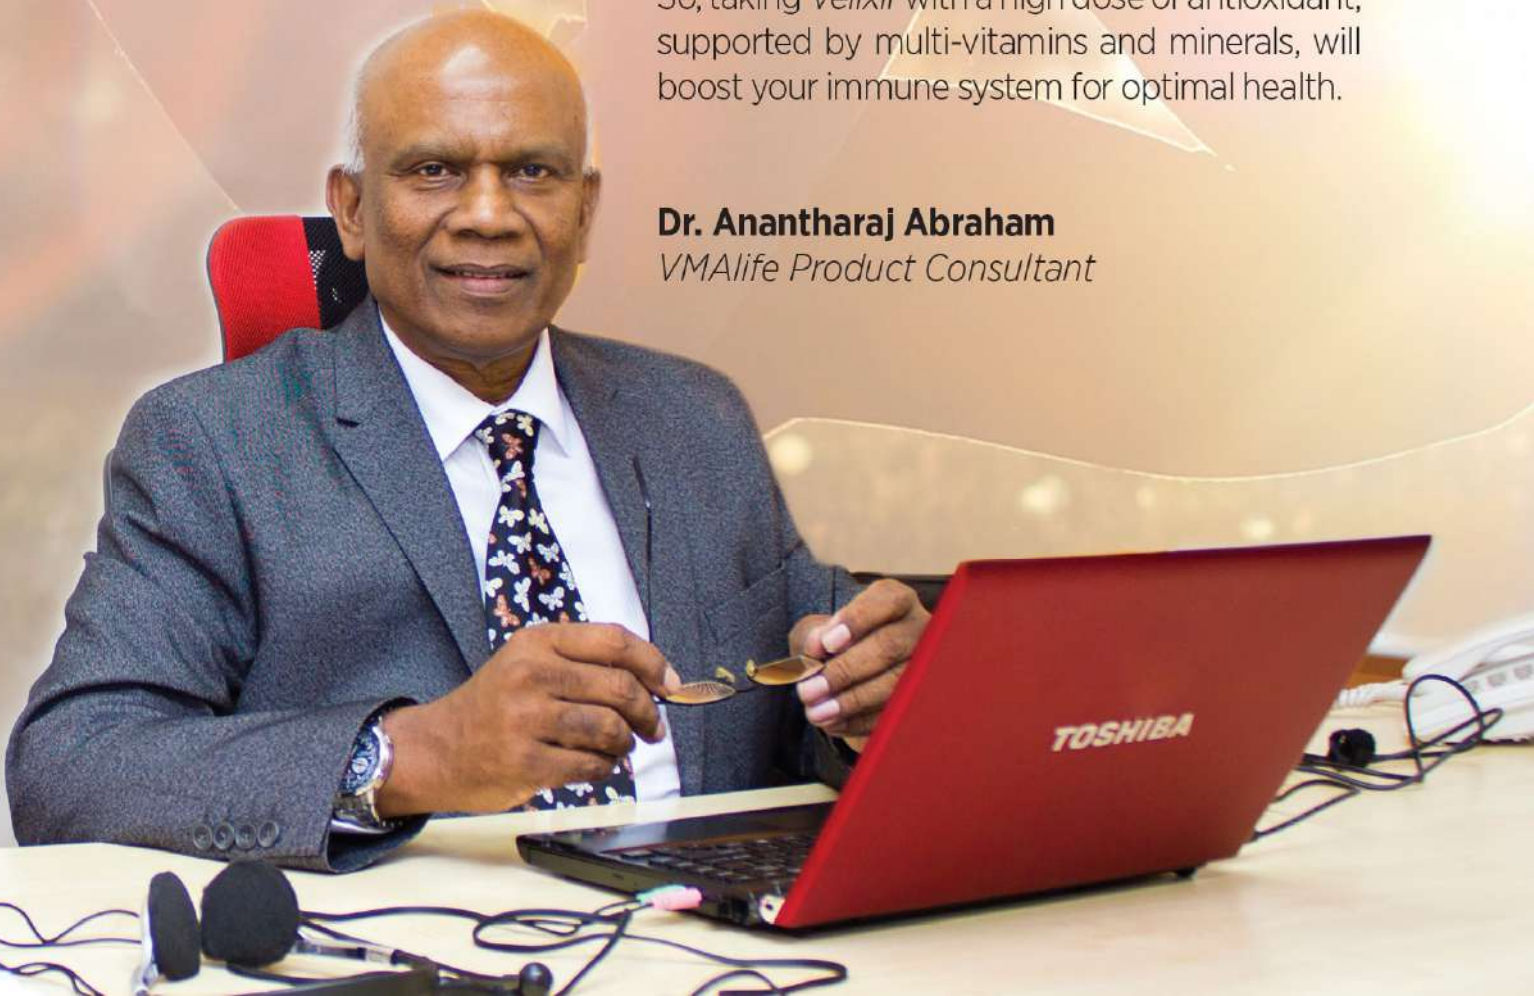

When you have a high dose of minerals in the product, your skin does recover faster. So someone with a skin allergy or skin problem like eczema, along with the regular treatment that they need to take, *Velixir* will definitely aid in their recovery process.

Velixir is the only product in the market at the moment with all the 4 items combined - that is multi-vitamins, multi-minerals (it has up to 74 minerals), enzymes, and antioxidants at an amount higher than required per day.

Now when you take *Velixir*, with a very high antioxidant level, the first area that receives recovery or repair would be the gut. This is the system that has a lot of immune tissues, and therefore they are boosted in their function and any infection you may have is affected to a large extent by how strong your immune system is.

So, taking *Velixir* with a high dose of antioxidant, supported by multi-vitamins and minerals, will boost your immune system for optimal health.

Report from Brunswick Labs

Brunswick Laboratories is an internationally recognized, independent, clinical and preclinical testing and research laboratory focusing on phytochemical testing, human cells based bioassays, and clinical studies for functional foods, nutritional supplements, and pharmaceutical products.

ORAC ANALYSIS

Oxygen Radical Absorbance Capacity (ORAC) tests are among the most acknowledged methods that measure antioxidant scavenging activity against oxygen radicals that are known to be involved in the pathogenesis of aging and many common diseases.

ORAC 6.0 consists of six types of ORAC assays that evaluate the antioxidant capacity of a material against six primary reactive oxygen species (ROs, commonly called "oxygen radicals") found in humans: peroxy radical (ORAC Hydro), hydroxyl radical (ORAC Lipo), superoxide anion (SORAC), singlet oxygen (SOAC), peroxy nitrite (NORAC), and hypochlorite (CORAC).

ORAC 6.0 provides scientific analysis that allows companies to fine tune their product formulations based on actual performance against free radicals. This analysis report helps companies to differentiate their premium nutrition products in a crowded field.

临床试验

美国Brunswick实验室，是一间的独立研究实验室，他的临床和临床前测试皆经过国际的认可，且擅长于人体细胞和功能性食品的生物基础测定，与营养补充品和药物产品的临床研究。

抗氧化值分析

自由基吸收能力 (ORAC) 测试是已知测量抗氧化剂清除活性氧的方法之一，目前已得知多数的老化和疾病皆是因为自由基所引起的。

ORAC 6.0由六种类型的ORAC测定所组成，其评估基于人类对于发现的六种主要活性氧 (ROS, 通常称为“氧自由基”) 之抗氧化能力: 过氧自由基 (ORAC Hydro), 羟基 (ORAC Lipo), 超氧阴离子 (SORAC), 单线态氧 (SOAC), 过氧亚硝酸盐 (NORAC) 和次氯酸盐 (CORAC)。

ORAC 6.0提供了精确的科学分析，可使企业根据自由基的实际数值来调整其产品配方。其分析报告有助于企业在竞争的营养补充品领域中脱颖而出。
