Customs

Partner for **40+** Customs in ECTS

Standardization
Digitalization
Automation

Provision of continuously evolving emerging

technology solutions under **AEO** system

ECTS Service Experience

Continuous innovation in **ECTS** practices over the past 8 years

Jointech has been providing ECTS services to customs in over 40 countries and regions in the past 8 years. We continuously iterate on emerging

technologies and solutions, providing standardized, digitized, and automated technological solutions practices for customs under the AEO system.

Emerging Technologies in ECTS

AI Recognition Technology

Scene Recognition, Identity Recognition

Information Technology

AEO Certificate, Customs Documents, Shipping
Documents, Customs System, Third Party,
Real Time Information on Site

Automation Technology

Data Acquisition, Edge Computing,
Autonomous Operation

Digital Twin

Real-time On-site Port Clearance Display

AIoT

Big Data, AI, Blockchain

# Technical Practices under The AEO System

Controllable

Data Acquisition of Documents, Operation, Security and Inspection by Intelligent Terminal
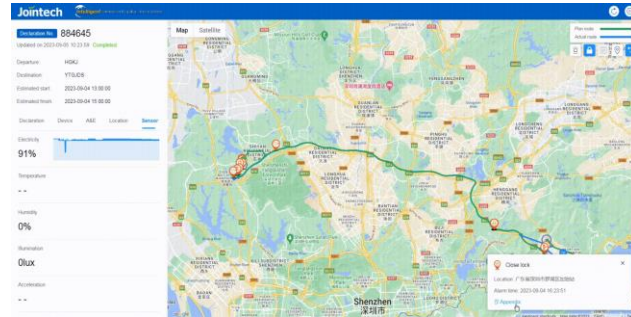

Releasable

End-to-End Supply Chain Visualization and Traceability of Asset Status

Quick Clearance

Process Automation, Scene Matching Automation, Inspection Recognition Automation

Emerging Technologies Contribute to Achieving AEO Objectives

Standardization

Standardization of Information Exchange Protocols, Communication Protocols for Intelligent Terminals and Regulatory Processes

Digitalization

Supply Chain Security, Digitization of Security and Asset Status, Visualization

Automation

Facilitated Customs Clearance, Reduced Clearance Time Enhanced Supply Chain Operational Efficiency

AEO Objectives

Greater Efficiency of Clearance

More Participating Enterprises

Better Risk Management

(Smuggling, Theft, Tax Evasion)

Various Application Scenarios in ECTS

Container Truck

Flatbed Truck

Breakbulk Cargo

Tanker Truck
