

4th Sept 2024, Wednesday

10.00 am–12.00 pm

26, Jalan Baiduri 39, Taman Baiduri,
42700, Banting, Selangor

TECHNICAL FIELD VISIT:

MERUJAYA POME SOLUTIONS SDN. BHD.

OVERVIEW

Merujaya Jaya POME Solutions provides an eco-friendly, efficient POME treatment system that reduces environmental impact, operates odor-free and color-free, and requires minimal maintenance. The visit will showcase their latest product, RT-ECO, an advanced Hybrid Electrochemical POME Treatment System. This system offers a minimal footprint, seamless plug-and-play operation, and resilience against temperature extremes. It produces sludge that is pure and free of additional chemicals, with negligible sludge generation, minimal civil work, low noise, and odor-free operation. For participants, this visit offers a valuable learning experience in the latest POME technologies, with a focus on sustainability, regulatory compliance, and system design. Attendees will gain insights into cutting-edge practices, enhance their operational methods, and build industry connections for collaboration and innovation, making it a sustainable and cost-effective solution for palm oil mill effluent management.
