

**DR HARI RAMALU**

# SUSTAINABLE SUPPLY CHAIN MANAGEMENT

## TOWARDS THE ACHIEVEMENT OF THE ESG GOALS

**5 & 6 OCTOBER 2026****9.00 AM - 5.00 PM****ENSEARCH OFFICE,  
PETALING UTAMA AVENUE**

### OVERVIEW

This training course provides an introduction to Environmental, Social and Governance (ESG) concepts and their growing importance across industries. It covers key topics including the meaning and importance of ESG, environmental impact, social governance practices, ESG reporting and the process of building an ESG framework. The course aims to increase sustainability awareness among participants by explaining the core component of ESG and highlighting the importance of integrating sustainable practices into business operations. It also emphasizes the need for transparency and accountability through proper ESG reporting.

The training provides participants with insights into the key drivers of sustainable supply chains, including environmental protection, social responsibility and ethical governance. It also addresses current challenges such as gaps in sustainability maturity among companies, limited SME capabilities and the need for stronger collaboration across industries

### OBJECTIVES

- Demonstrate understanding of sustainability and supply chain management - risk and opportunity
- Understand how to incorporate sustainability into existing supply chain planning, management and assessment/monitoring.
- Promote sustainable supply chain management strategies within your organization and with your supply chain.
- Manage a supply chain using valuable tools
