CLEARANCE OF GOODS

Pre-arrival clearance through our trusted digital platforms enables users to complete the customs clearance process for goods before they arrive at the border points, by submitting all required documents, obtaining necessary declarations, and paying the associated fees in advance, pre-arrival clearance ensures a smooth and expedited entry of goods, reducing wait times and enhancing logistical efficiency.

RIMAH System

The RIMAH smart system enhances the capabilities of Abu Dhabi Customs operations by following global best practices and WCO standards. The system effectively monitors shipments before they arrive, enhancing control and real-time prediction analysis through data, artificial intelligence, and machine learning.

IMAGE ANALYSIS SYSTEM

Image Analysis System is Abu Dhabi Customs' central system that integrates detection devices across land, sea, and air. It allows customs officers to remotely analyze images, link them with shipment and vehicle data, and streamline the entire valuation process, enhancing accuracy, efficiency, and overall operational performance.

E-SEAL

Electronic lead lock is used to track containers and trucks loaded with goods when they are transported within the country's ports. This lock ensures the safety of the shipment during transportation between the ports.

CUSTOMS CLEARANCE JOURNEY

Etihad Rail offers seamless shipping with full import/export management, covering customs clearance, bonded storage, goods transfers, and documentation, providing exclusive cargo transport benefits including:

- Seamless transfer of containers from Khalifa Port through the ICAD Terminal in Abu Dhabi to the Ghweifat Terminal, without the need of organizing a statement, presenting permits or collecting a deposit.
- Auto generation of truck crossing permits.
- Logging cargo containers numbers in the customs system for precise tracking.
- Express lane for train shipments in the borders to speed up the process.
- Full time customs officer at Etihad Rail HQ.
