# COMPANY PROFILE

## CGN Begood Technology Co., Ltd.

Established in 2001 and headquartered in Nanchang Hi-tech Zone in China, CGN Begood specialises in nuclear instrumentation and intelligent regulatory equipment development, software development and system integration, providing intelligent regulatory solutions for nuclear and radiation regulation, safety inspection and port supervision. CGN Begood's R&D personnel comprise 50% of the total staff, constituting a scientific research team led by PhDs and masters. Recognized as a key high-tech enterprise and a national speciality leading enterprise, CGN Begood is an industrial development platform of CGN's measurement and control equipment.

### Technical Advantage

Talent Team: R&D team with doctors & masters as backbone

National Platform: National Engineering Research Center & Workstation for Postdoctoral Programme

Technical Achievements: More than 300 technical achievements, National Science & Technology Awards

### Integration Advantage

With the prestigious Top-tier IT Qualifications, CGN Begood capitalize on the comprehensive strengths of specialized equipment, software, and system integration to provide the overall solution for intelligent supervision.

### Product Advantage

Successfully commercialized scientific research outcomes, resulting in three major series comprising over 100 products.

### Enterprise Resource

CGN group has assets exceeding one trillion yuan(CNY) more than 700 member companies, and 5 listed platforms

### Credit Guarantee

Key high-tech enterprise and Key software enterprise, Class-A Taxpayer

## Awards

Management System

Key High-Tech & Specialized and Sophisticated Enterprise

Science & Technology Awards

Intellectual Properties

## Technical Team

CGN Begood gives priority to its human resources management strategy. We currently have almost 500 employees, 60% of whom have a bachelor's degree or higher. We have more than 200 technical staff, accounting for nearly 50% of the total. With doctors and masters as the backbone, CGN Begood is forging a high level R&D team.

## Security Inspection System

### Cargo&Vehicle Inspection

- Small Vehicle Inspection System
- Cargo/Vehicle Inspection System
- Empty Container Inspection System
- Backscatter Imaging System
- Under Vehicle Scanning System

### Baggage & Parcel Inspection

- X-ray Baggage and Parcel Inspection System
- CT Baggage and Parcel Inspection System

### Human Body Inspection

- Metal Detector(door)
- Millimeter Wave Body Inspection System

### Nuclear/ Biochemical and Contraband Detection

- Radiation Detection
- Biological and Chemical Factor Monitor
- Narcotics and Explosives Detection
- Threat and Contraband Inspection

### System Platform

- Centralized Image Review System
- Intelligent Image Review System
- Cloud Platform

# PRODUCTS

CGN BEGOOD TECHNOLOGY CO., LTD.

### Passenger Vehicle Inspection System

- Top-down Scanning
- Precise Scanning Mode/Fast Scanning Mode
- Advanced Imaging Algorithm

### Small Vehicle Inspection System

- Top-down Scanning
- Precise Scanning Mode/Fast Scanning Mode
- Good Penetration Capability

### Mobile Cargo/Vehicle Inspection System

- 6/3 MeV Linac
- Precise Scanning Mode/Fast Scanning Mode
- Free to Transfer to Different Spot

### Railway Cargo/Vehicle Inspection System

- 9/6 MeV Linac
- Fast scanning Mode
- Automatically Avoid the Passenger Carriage

### Fixed Cargo/Vehicle Inspection System

- 6/3 MeV Linac
- Fast Scanning Mode
- Good Material Discrimination Capability

### Relocatable Cargo/Vehicle Inspection System

- 7/4 MeV Linac
- Precise Scanning Mode/Fast Scanning Mode
- Advanced Imaging Algorithm

### Backscatter Imaging System

- Three-view Backscatter Scanning
- Fast Scanning Mode
- High Sensitivity

### Empty Container Inspection System

- Side-illuminated Scanning
- Fast Scanning Mode
- Small Footprint

# PRODUCTS

CGN BEGOOD TECHNOLOGY CO., LTD.

## X-ray Baggage and Parcel Inspection System

## CT Baggage and Parcel Inspection System

## Millimeter Wave Human Security Inspection System

## Drugs & Explosives Detection Devices

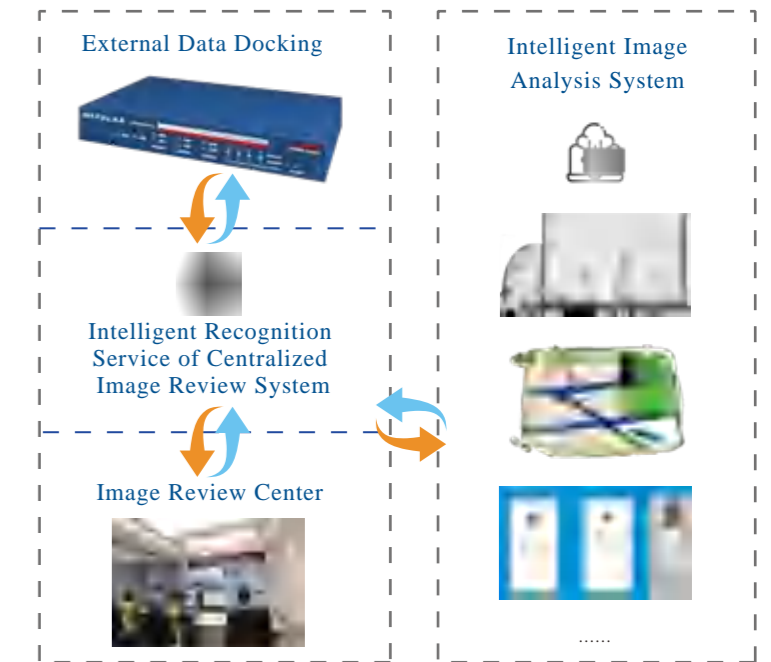

## Radiation Detection Devices

## Centralized Image Review System

Through a centrally deployed image analysis station, images scanned by CT, X-ray, and millimeter wave equipment are centrally reviewed and analyzed, with unified management and standardized archiving. The system can automatically assign image review tasks, inspect the images, label suspicious items, and provide real-time feedback to on-site inspectors to guide subsequent handling. This process significantly improves the efficiency and standardization of image review.

## Intelligent Image Review System

Utilizing advanced image recognition technology, it conducts automated analysis of imaging inspection images, able to automatically identify and label common contraband items such as guns, knives, explosives, and drugs. This intelligent auxiliary function significantly enhances the efficiency and accuracy of inspection work, helping inspectors quickly identify and handle suspicious items.

Intelligent Image Review System for Baggage Inspection

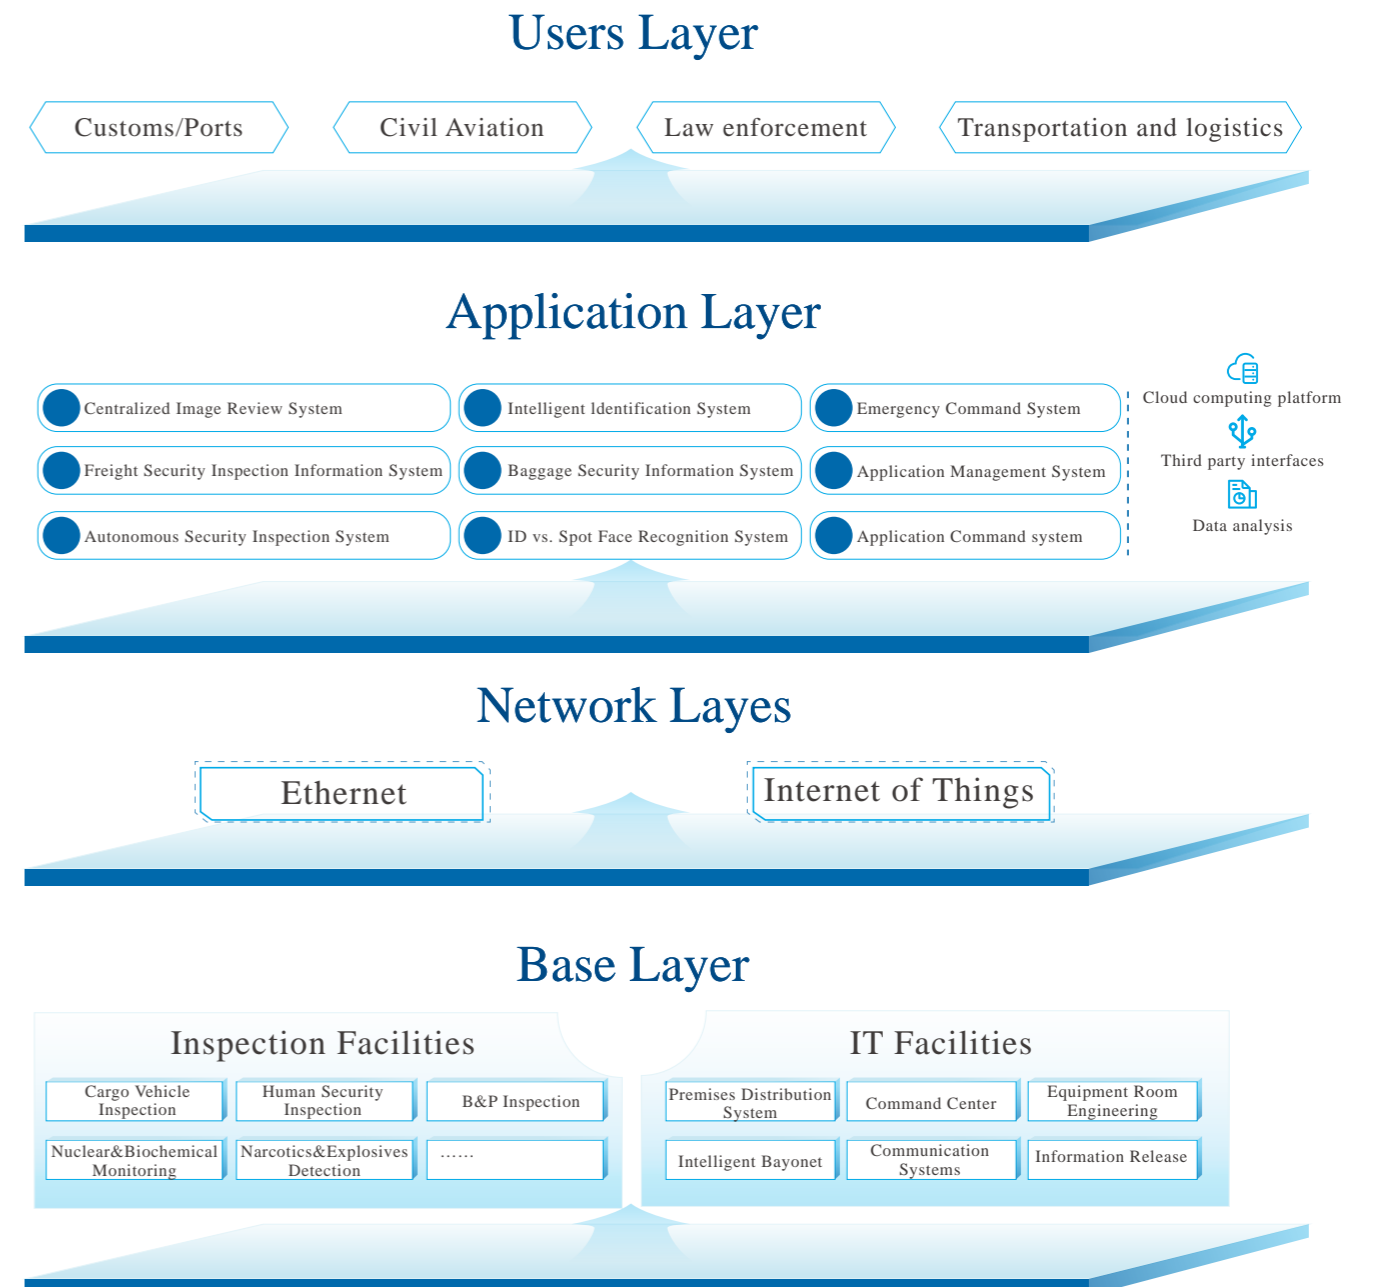

Intelligent Image Review System for Cargo/Vehicle Inspection

# SOLUTIONS & APPLICATIONS

## Applications

## Topology of Our Solutions

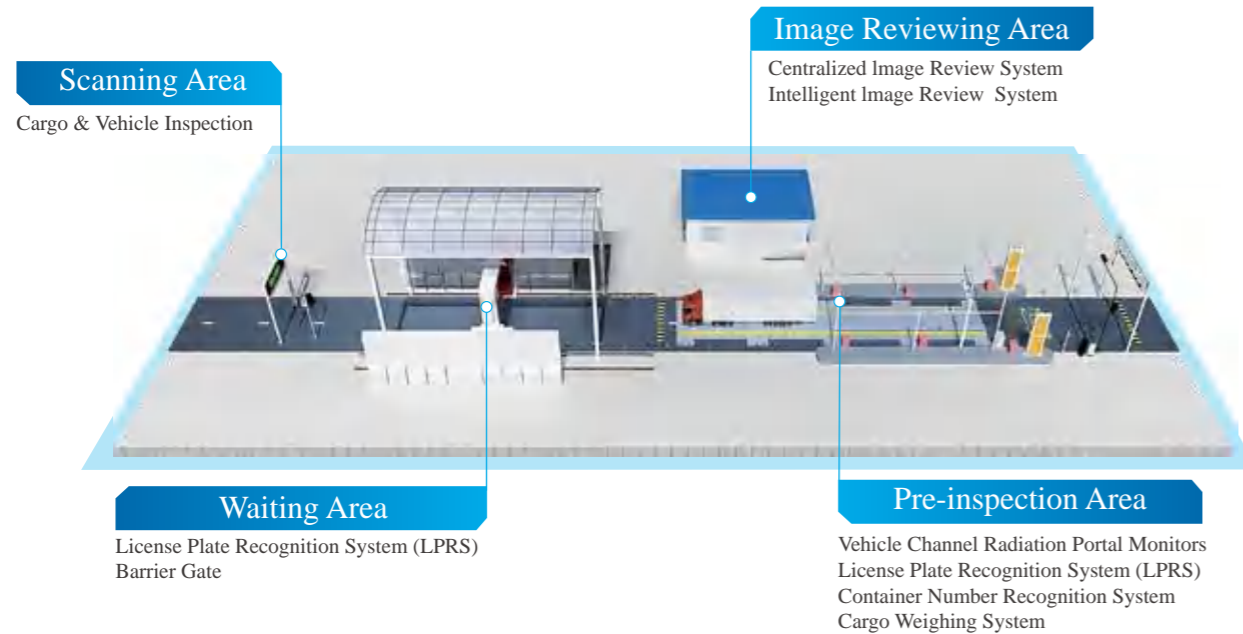

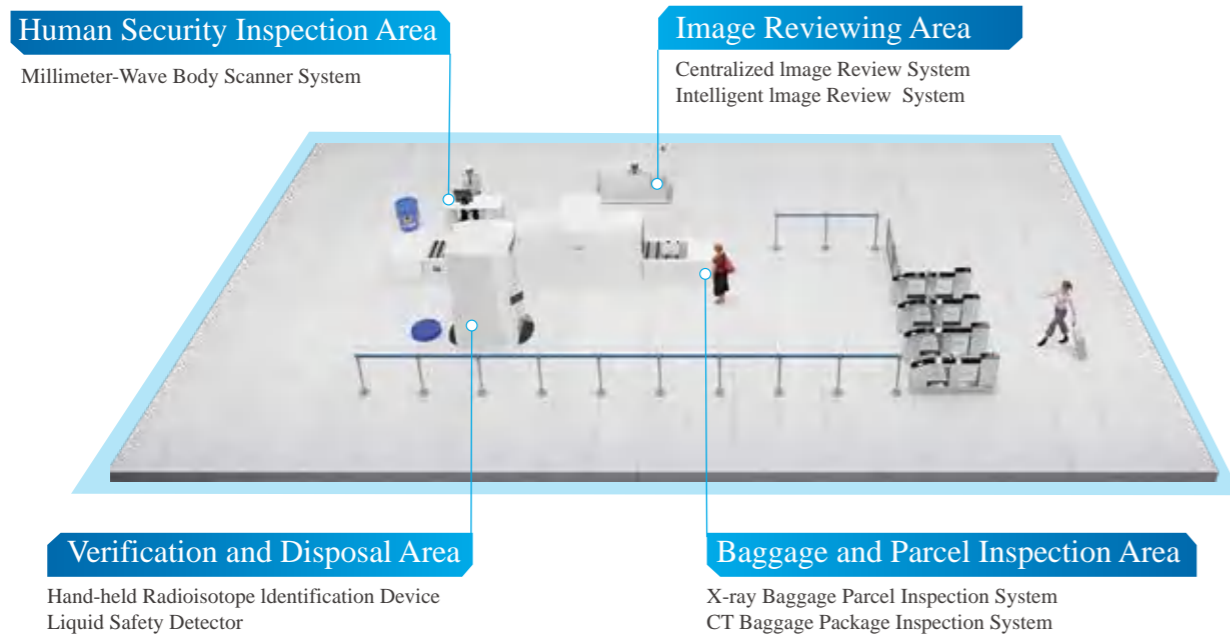

## Our Solution Diagram

### Deployment of Cargo Vehicle Inspection System

### Deployment of Personnel, Baggage and Parcel Inspection System

CGN Begood has won tenders for more than ten sets of large cargo vehicle inspection systems in Dalian and Qingdao Customs, Xinjiang Logistics Park, Xiangtang and Guiyang Railway Port, etc. The system has also been exported to Nepal, Malaysia, Kazakhstan and Namibia.
