

**Supporting the integration of advanced technologies and fostering collaboration between carriers and customs agencies to streamline borders crossing procedures**

Lucas Lagier, Senior Adviser, IRU

November 2024

## INTEGRATION OF ADVANCED TECHNOLOGIES

- For presentation of advance information
- For effective risk analysis
- For facilitated exchange of data between stakeholder
- For enhanced safety and security
- For good collaboration with customs
- And boosted border crossing process

**DIGITALISATION IS KEY**

The image shows two men in a server room. They are leaning over a desk with several computer monitors. The monitors display various data visualizations, including world maps with network connections and complex diagrams. The room is dimly lit, with the primary light source being the screens. The overall color palette is dominated by blues and greys.

INTEROPERABILITY CHALLENGES

OPTIMISATION OF MECHANISMS

The transition to digitalisation to leverage existing platforms and data channels to minimise data handling and enhance the transparency of trade.

REDUCE BORDER DELAYS

HARMONISED TRANSIT SYSTEMS AS A SOLUTION

Harmonised transit systems speed up border crossing times  
by up to 92% and cuts costs by up to 50%

For a world **in motion**
