

WCO Technology Conference & Exhibition

Rio de Janeiro, Brazil
12-14 November 2024

Abu Dhabi Customs Blockchain Platform:

We will delve into Abu Dhabi Customs' efforts in establishing a digital trade ecosystem, bringing together customs, ports, transport/logistics, technology companies, and trade and supply chain finance providers for seamless collaboration. We will address practical challenges and offer insights on measuring the success of digital trade adoption.

Content:

1. Introductory Video [1:70]
2. Benefits of Tradechain
3. Structure & Methodology
4. Expected Value
5. On-Boarding steps

1.2. TradeChain Platform

The goal of the TradeChain platform is to receive data on shipments and attachments through the chain of parties involved in shipping and transportation, through which shipment data and information are exchanged with the chain of customers to increase the speed of goods clearance and increase the accuracy and quality of the data exchanged, which serves risk management and customs inspection mechanisms.

1.3. Desired Benefits

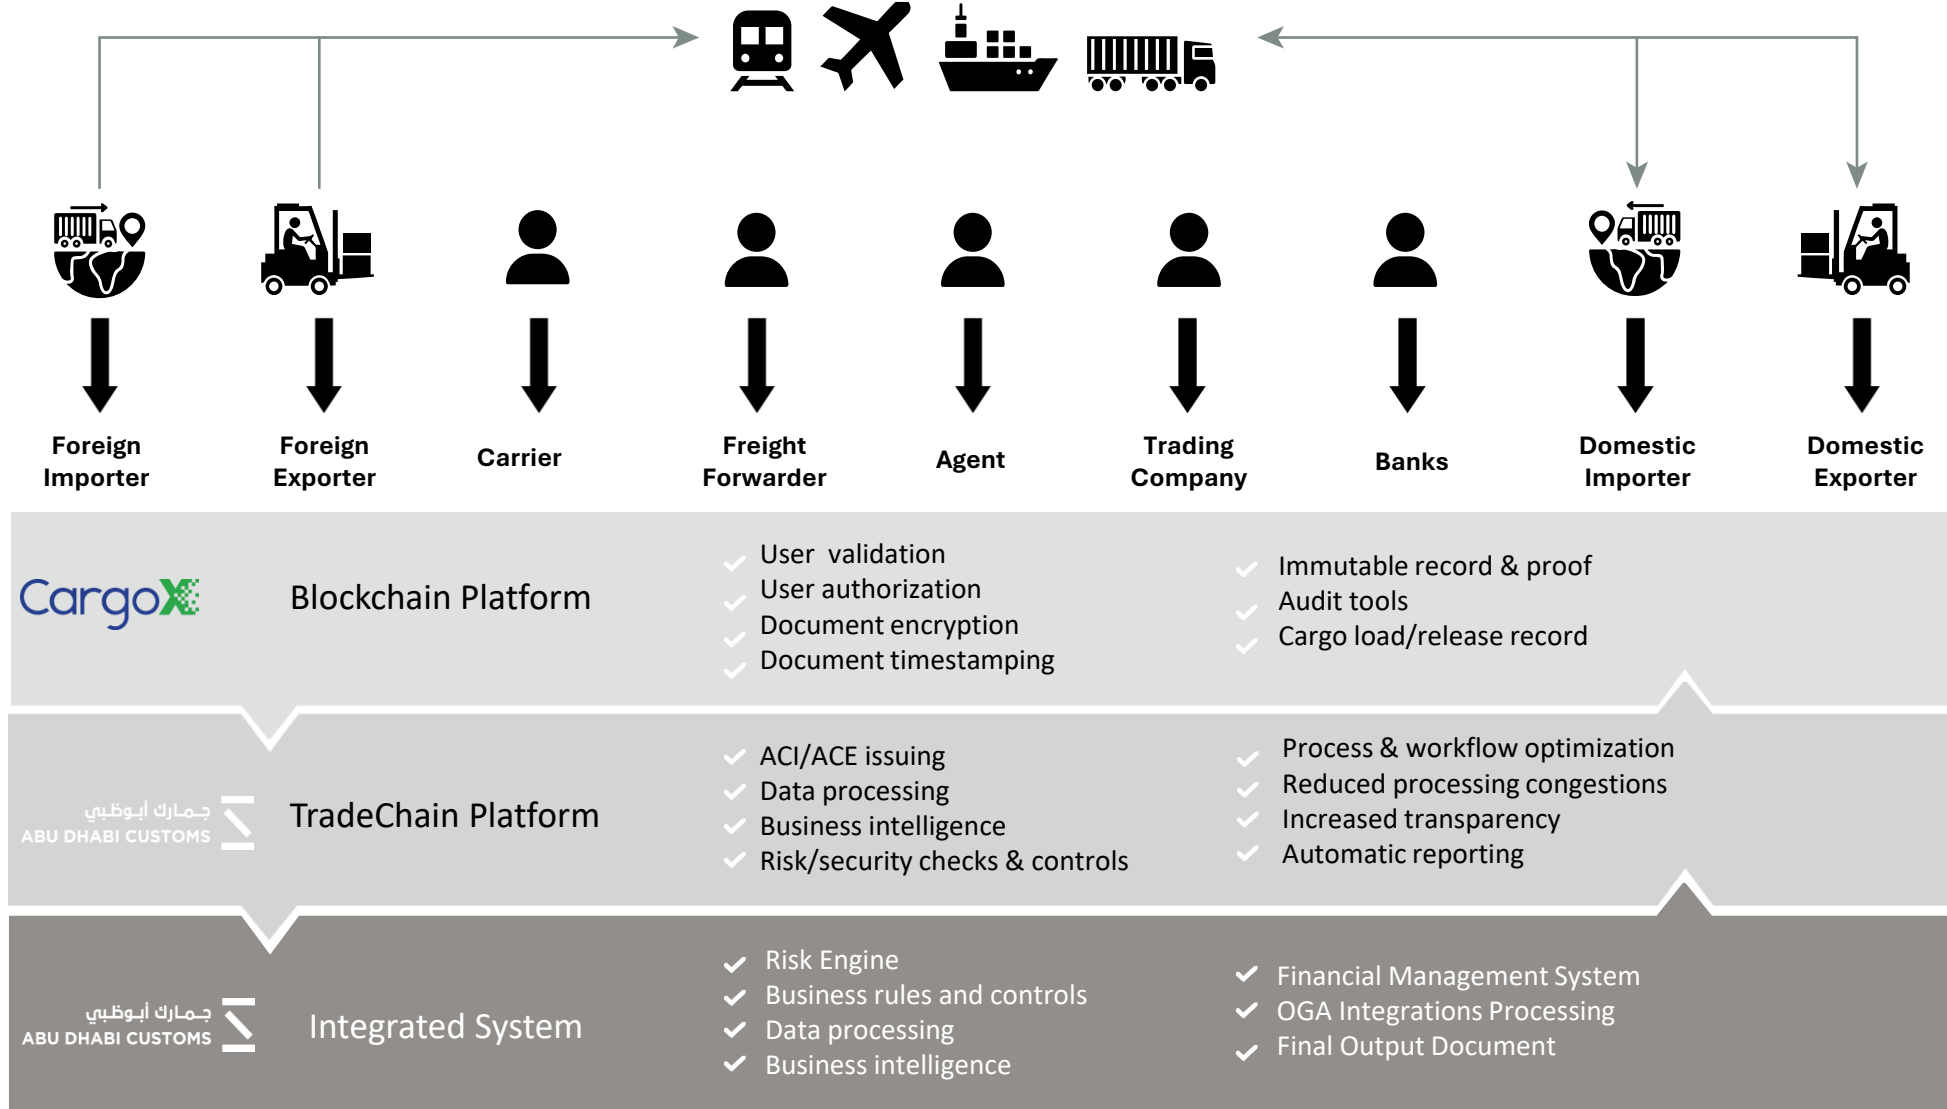

- Increasing the pre-clearance index, which is a vital indicator that reflects the development of Abu Dhabi Customs.
- Increasing the efficiency and effectiveness of human resources in supply chains and trade.
- Reducing goods clearance time.
- The immediate flow of information that can be exchanged with different parties securely.
- Random processing to inspect and target high-risk shipments.
- Enhancing the quality of inspection, which affects increased security.
- Modern and advanced technical structure.

Exchanging information with entities in the shipping network/chain

Abu Dhabi Customs Blockchain Platform:

2. AD Customs TradeChain

3. AD Customs TradeChain

Documents are not just paper anymore

- Documents are DATA.
- Data is STRUCTURED
- Data can be easily PROCESSED
- Processes can be AUTOMATIC
- Errors can be ELIMINATED
- Data can be CONTROLLED / POSSESSION

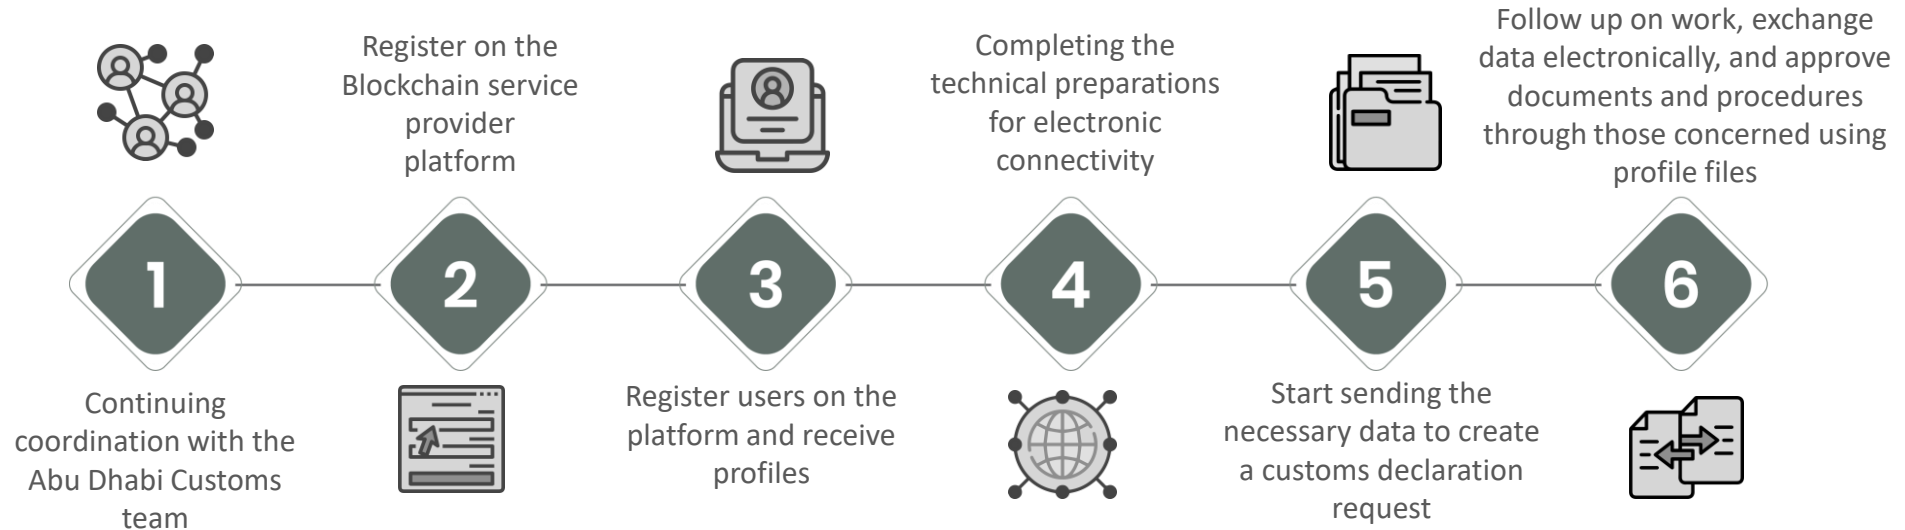

Trusted data enables efficiency

- Workflows can be AUTOMATED
- Processing can be FAST.
- Data is entered ONLY ONCE
- Status is always VISIBLE

Blockchain has become a standard part of business Processing

- It is used to TRANSFER Processing
- It is always ONLINE, 24/7
- It is Transparent & TRUSTWORTHY
- It is UNDISPUTABLE
- Transactions can be AUDITED

4. Starting Steps / On-Boarding
