

# e-PoC – project for the digitalization of proofs of origin

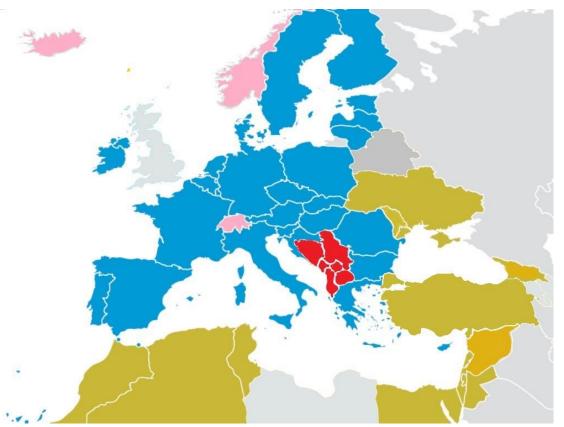

3 February 2025

WCO Global Forum on Origin Interconnectivity

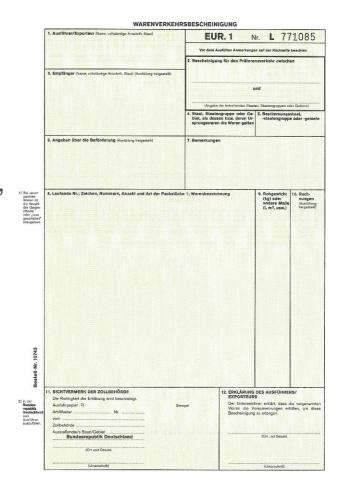

Antonino de Lorenzo, DG TAXUD, Unit A6 Svetlana Raudonen, DG TAXUD, Unit B1

### The geographical scope of the PEM Convention

The PanEuroMed zone: 25 partners

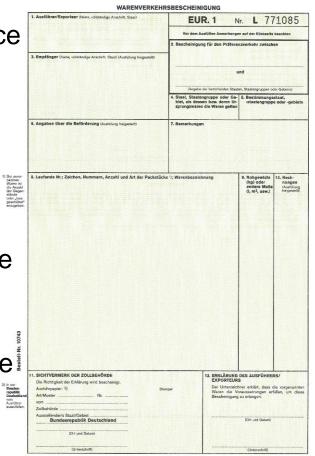

- EU
- EFTA States (CH, IS, LI, NO)
- Faroe Islands (FO)
- Western Balkans (AL BA, MK, ME, RS, Kosovo\*)
- Participants in the Barcelona Process (DZ, EG, IL, JO, LB, MA, PS, TN, TR, SY)
- Eastern partnership (MD, UA, GE)

#### **Problem Statement**

- Certificates are issued on paper with ink stamps and hand written signatures of customs officials
- Risk of human mistakes in course of fulfilment of application or issuance of certificates
- EUR.1 certificates contain several boxes for free text
- Impossible to perform automated cross-checks with the data in the export/import customs declaration
- Paper-based country-to-country interaction for verification purposes
- COVID 19 challenges and new initiatives to digitalise EUR.1 from some of the PEM members
- If a certificate is electronically issued, its authenticity cannot be automatically cross-checked and some PEM members in the region are not ready to accept digitally issued certificates
- Need to establish the legal ground for the use of electronic certificates

#### Legal base for electronic certificates in PEM region

- The Joint Committee of the PEM Convention issued decision 1/2024 on the use of electronic certificates (12 December 2024)
- It establishes the conditions for the use of movement certificates EUR.1.
   issued electronically
- Applicability: revised Convention as from 1 January 2025
- Based on the PEM JC Recommendation 1/2023 agreed among all the Contracting Parties

### Future vision - PEM e-PoC digital environment for proofs of origin

EU e-PoC system

PEM authorities responsible for issuance of proofs of origin within the local environment\*

5

Support the automated verification by customs proofs of origin required for goods clearance

Allow customs competent authorities to properly monitor and control the quantities of goods imported with preferential origin certificates - quantity management

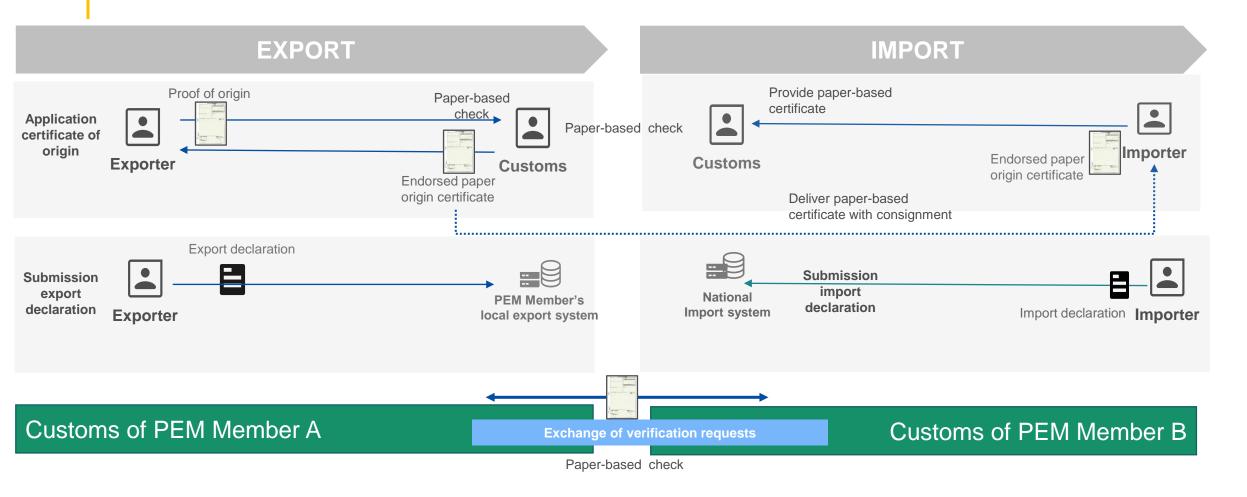

Serve as single communication channel for Economic Operators to fulfil the relevant application and submission of additional information required for proof of origin

Possibility to be used as a platform for administrative cooperation between customs authorities of PEM and EU MSs

#### **CURRENT SITUATION: Certificate on paper**

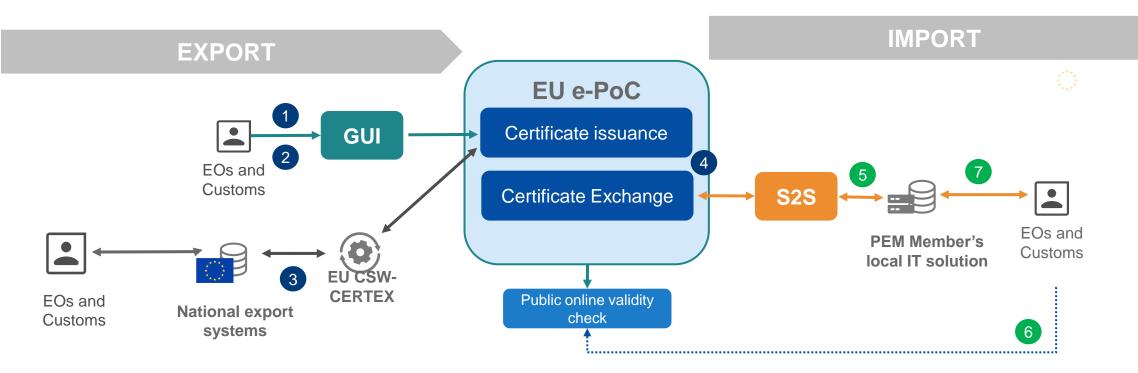

Issuance of the certificate in the exporting country (PEM member A) and consumption of

the EUR.1 in the importing country (PEM member B (eg. EU))

European Commission

#### TO-BE: EU e-PoC export from EU to PEM with local IT solution

#### Legend:

1 EU EOs are applying for certificates in an e-PoC via web-based application 2 EU Customs control information and issue certificates in an e-PoC via webbased application

3 Prior to the enforcement of certificate the automatic control with export declaration to be performed

4 Once certificate is endorsed the automatic exchange of information with country of import/beneficiary country will be performed

5 Upload certificate to local IT module – machine-to-machine exchange 6 EO of importing country could check the validity of certificate received from partner via web-based portal of e-PoC prior to the submission of import declaration

7 Customs of importing country verify the authenticity of certificates in their own IT solution (they could also to use public online validity check engine) during the customs clearance

European Commission

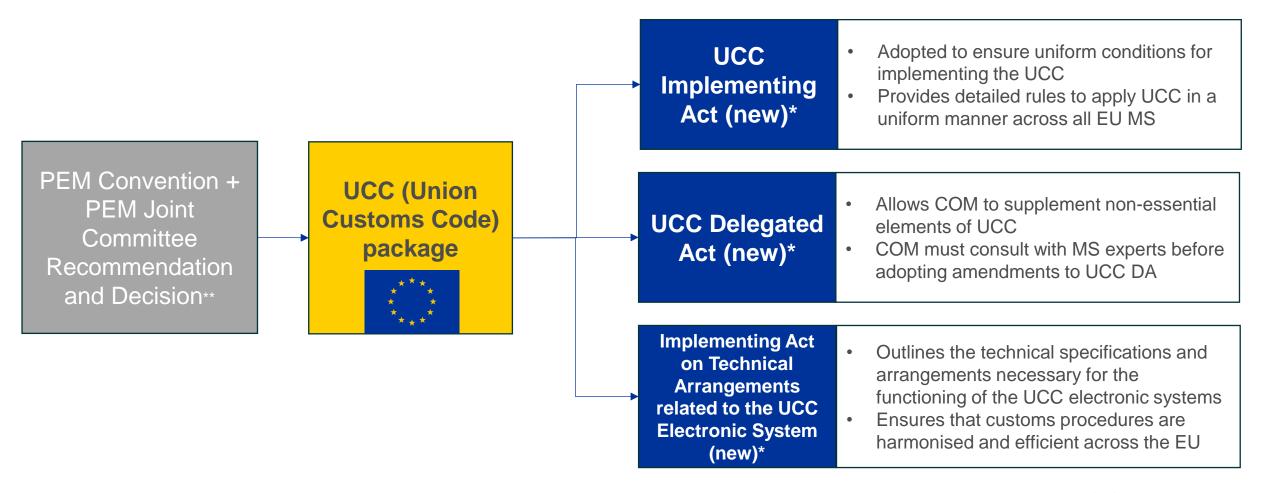

#### Future outlook and next steps

**Process related building blocks** New Regulation on data Business and technical analysis Legal act for establishing of e-PoC requirements Package: Commission proposal for **Business Case** This is to ensure structural and amending of UCC Implementing Feasibility Study automated way for data exchange Regulation No 2015/2447 **Business Process Models** and storage of information Etc. between customs authorities as Comitology, Examination well with PEM partners Commission is examining jointly with Procedure Member States and Trade representatives Amendments of Annex the business process flow related to the Voting in CUSTOMS EXPERT digitalisation via evolution of the process **GROUP ORIGIN section** from paper to digital Voting in ORIGIN Committee

Once the analysis is finished the package to be adopted by stakeholders

Outcome: in line with EU IT governance process the development of the system will start after the adoption of legal acts and approval of the package of documents by relevant bodies

#### EU Legal Package

## Introduction of new act of UCC on data elements

General objective of UCC DA	•	The UCC DA supplements the UCC by providing detailed rules and procedures to ensure effective implementation. The Lisbon Treaty (Article 290 of the Treaty on the Functioning of the European Union) empowers COM to adopt DA efficiently by allowing for flexibility and timely updates to legislation without requiring a full legislative process.	
Specific objective of new amendments to UCC DA and UCC IA	•	<ul> <li>Electronic application: Exporters will submit their application for the EUR.1 certificate electronically, along with supporting documents.</li> <li>Compliance with data requirements: The application for the EUR.1 certificate must comply with the data requirements to be listed in new Annexes of the Act Implementation timeline: From the deployment date, exporters are obliged to lodge their application through the EU e-PoC system.</li> </ul>	

### Thank you
