October 17–18, 2025, CCEC @ The Vertical

## **WELCOME MESSAGE**

### **from Chairperson, Dr Wong Wei Jin**

Colleagues and Friends,

On behalf of the Malaysian Upper Gastrointestinal Surgical Society (MUGIS), in collaboration with the Upper Gastrointestinal Southeast Asian Network (USAN), it is my great pleasure to welcome you to MUGIS/USAN 2025, taking place on October 17–18, 2025, at the VE Hotel, Kuala Lumpur, Malaysia.

The theme for this year's meeting, "Precision Medicine – Navigating Patient-Centered Outcomes," reflects the growing focus on personalized healthcare approaches. Gone are the days of "one size fits all" treatment approaches. Our understanding of precision oncology demands a personalized approach to each patient, as our understanding of cancer genetics and response to different treatment modalities evolves. Additionally, with the multitude of treatment options now available for functional UGI disease and obesity, an understanding of which procedure or treatment modality suits which patient the best is essential for optimal outcomes. The concept of "right drug, right dose, right patient" has now evolved to "right treatment, right dose, right patient." We are uniquely positioned and obligated to leverage advancements in technology, genomics, and multidisciplinary collaboration to address the distinct needs of our patients.

MUGIS/USAN 2025 promises an engaging program designed to foster knowledge exchange, skill development, and regional collaboration. We will bring together leading experts, clinicians, and researchers from across Southeast Asia and beyond to explore groundbreaking advancements and share best practices in UGI care.

Warm regards,  
**Dr. Wong Wei Jin**  
Organising Chair
