

FOUNDATION IN PSYCHOLOGY

(MQA/PA 17767)

PROGRAMME DESCRIPTION

The Foundation in Psychology program is designed to equip students with essential fundamental concepts, preparing them for undergraduate studies in psychology. The curriculum covers key psychological theories and practical skills, fostering critical thinking and a deep understanding of human behavior. This program also aims to develop students' communication, problem-solving, and interpersonal skills, which are crucial for success in both academic and professional settings. By the end of the program, students will be well-prepared to pursue their chosen psychology-related fields with confidence.

STUDY PROSPECTS

Graduates of the Foundation in Psychology program will be able to:

- Progress to a Bachelor's degree in Psychology or related fields.
- Develop critical thinking, research, and problem-solving skills for higher studies.
- Build a strong foundation in psychological theories and applications across various disciplines.

WHAT SKILLS WILL YOU DEVELOP?

- Graduates will be able to apply psychological concepts to explain key ideas, principles, and processes, using them to solve problems.
- Graduates will be able to communicate psychological findings clearly through writing and presentations for both academic and non-academic audiences.
- Graduates will be able to independently research, interpret, and apply psychological information, fostering lifelong learning and professional development.
