

Organised by

DIGITAL HEALTH MALAYSIA CONFERENCE 2026

02 - 04 OCTOBER 2026 | ASIA PACIFIC UNIVERSITY

FIRST ANNOUNCEMENT

ABOUT DIGITAL HEALTH MALAYSIA

Digital Health Malaysia (DHM), previously known as Telemedicine Development Group (TDG) was formed in 2015 following the first telemedicine conference. It is a platform where healthcare professionals, researchers, and industry collaborate to advance the digital health agenda. In partnerships with relevant ministries and agencies, it constantly gathers input from stakeholders of diverse backgrounds and interdisciplines, in exchanging ideas and exploring collaboration opportunities in the field of telemedicine, telehealth, and AI. It aligns itself with the National Science Technology and Innovation (STI) Policy and the ever-evolving triple helix ecosystem (Regulator/Researcher/Industry).

ABOUT DHM 2026

The 9th edition of the Digital Health Malaysia (DHM) Conference reaffirms DHM's continued commitment to advancing digital health in Malaysia since its inception in 2015. This year's theme, **"Building a safe and effective patient centric ecosystem,"** marks a watershed moment for Digital Health in Malaysia. Besides highlighting the urgent need to align digital health efforts across stakeholders amid increasing complexity in Malaysia's healthcare landscape, DHM 2026 hopes to initiate change and provide a vision going forward through multi-stakeholder collaborations.

Recognising the country's unique dual-sector healthcare system and the accelerating pace of digital transformation, the conference will address the critical need for secure, responsible, and meaningful use of health data. The conference will discuss the importance of technological interoperability, standards, trust frameworks, and cross-sector collaboration to create a more resilient and inclusive healthcare ecosystem.

The three-day conference promises to serve as a platform for dialogue and action, bringing together policymakers, insurers, healthcare providers, tech innovators, and experts to explore emerging models, share case studies, and chart a practical path forward. A stakeholder consortium will be formed following the conference to work on an actionable financing and data framework for Malaysia. Attendees are encouraged to use this opportunity not only for knowledge exchange but to forge new partnerships and contribute to a patient-centric, data-driven health system in Malaysia and beyond.

WELCOME MESSAGE

It is my great pleasure to welcome you to the Digital Health Malaysia Conference 2026 (DHM 2026). This year's conference will bring together policymakers, regulators, insurers, technology providers, and data governance experts to provide an actionable framework for data sharing and interoperability. The initiative aims to harmonize standards, establish robust governance mechanisms, and promote scalable solutions that enable the exchange of trusted data across sectors and jurisdictions.

Through a keynote address, technical panels, and collaborative symposia, participants will address:

- The development of shared data and interoperability standards;
- Regulatory and policy frameworks enabling secure data sharing;
- Architecture for a cross-sectoral insurance data platform;
- Case studies and early use cases demonstrating practical implementation;
- Challenges and opportunities in aligning diverse stakeholders.

The conference will set the stage for a coordinated effort to break down data silos, enhance risk intelligence, and enable a more responsive, transparent, and inclusive Digital Health ecosystem. By framing a common path forward, the conference supports a future in which data flows responsibly and reliably – across borders, platforms, and institutions.

PROF. DR. WONG CHEE PIAU
ORGANISING CHAIR
DHM 2026

COMMITTEE MEMBERS

Organising Chair

Professor Dr. WONG Chee Piau

Organising Committee

- Mr. Adrian ABDUL GHANI (Sponsorship)
- Mr. G. Saravanan (Booth and Exhibition)
- Ms. LIM En Ni (Publicity)
- Dr. Feisul Idzwan MUSTAPHA (Finance)
- Mr. John YEO (Logistics and Communication)
- Dr. Azrin ZUBIR (Booth and Exhibition)

Scientific Committee

- Mr. Mohd Parid SULAIMAN (Scientific Chair)
- Dr. Karleen CHONG
- Dr. CHONG Yung Wey
- Mr. Jay EVANS
- Dr. Kamarul Imran MUSA
- Assoc. Prof. Dr. Nasriah ZAKARIA
- Dr. Azrin ZUBIR

VENUE

ASIA PACIFIC UNIVERSITY

📍 Jalan Teknologi 5, Taman Teknologi Malaysia, 57000
Kuala Lumpur, Malaysia

WHO SHOULD ATTEND?

Key Decision Makers

- Regulators and policymakers in health tech and data privacy
- Government representatives from the Ministry of Health, MOSTI, and MDEC
- Hospital CEOs and Medical Directors
- C-level executives (CTOs, CIOs, CMOs) from healthcare organisations
- Investors and VCs focused on healthcare innovation
- Heads of university medical faculties and research institutions

Service Providers

- Private hospitals and health system providers
- Insurance companies and health plan providers
- Health tech startups and digital platform developers
- Telemedicine service providers
- Pharma and MedTech companies with digital solutions
- IT service providers specialising in AI, data, & cybersecurity for healthcare

Professionals and Caregivers

- Medical professionals
- Nurses and allied health professionals (dietitians, physiotherapists, etc.)
- Caregivers
- Home care providers adopting remote health technologies
- Digital health educators and trainers

End Users

- Health-conscious individuals interested in wearables and apps
- Users of digital therapeutics or mobile health platforms
- Digital-savvy individuals seeking to understand how health data is used
- Health and wellness advocates or influencers

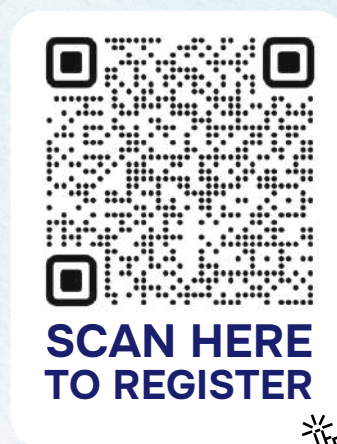

REGISTER NOW

	MEMBER	NON-MEMBER
Delegate	RM 650	RM 800
Students	RM 300	RM 400

GROUP REGISTRATION

≥ 5	≥ 10
10% OFF	20% OFF
10% OFF	20% OFF

*Email to the secretariat to enjoy the group rate

REGISTER AS A GROUP AND ENJOY DISCOUNTED RATES!

STEP 1

Gather a group of participants, 5 or more.

STEP 2

A representative (leader) from the group is to submit the group registration template to the secretariat.

STEP 3

Each member will receive an email with a direct link. The link is unique for each member and should not be shared.

STEP 4

The Member will be required to use the link to complete the registration and proceed with the payment to secure the registration slot
