DIGITAL HEALTH MALAYSIA CONFERENCE 2025

22-24 SEPTEMBER 2025 | KUALA LUMPUR

FIRST ANNOUNCEMENT

ABOUT DIGITAL HEALTH MALAYSIA

Digital Health Malaysia (DHM), previously known as Telemedicine Development Group (TDG) was formed in 2015 following the first telemedicine conference. It is a platform where healthcare professionals, researchers, and industry collaborate to advance the digital health agenda. In partnerships with relevant ministries and agencies, it constantly gathers input from stakeholders of diverse backgrounds and interdisciplines, in exchanging ideas and exploring collaboration opportunities in the field of telemedicine, telehealth, and AI. It aligns itself with the National Science Technology and Innovation (STI) Policy and the ever-evolving triple helix ecosystem (Regulator/Researcher/Industry).

ABOUT DHM 2025

The 8th edition of the Digital Health Malaysia (DHM) Conference reaffirms DHM's continued commitment to advancing digital health in Malaysia since its inception in 2015. This year's theme, **"Towards a Common Insurance and Data Framework: Standards, Governance, and Interoperability,"** marks a watershed moment for Digital Health in Malaysia. Besides highlighting the urgent need to align digital health efforts across stakeholders amid increasing complexity in Malaysia's healthcare landscape, DHM 2025 hopes to initiate change and provide a vision going forward through multi-stakeholder collaborations.

Recognising the country's unique dual-sector healthcare system and the accelerating pace of digital transformation, the conference will address the critical need for secure, responsible, and meaningful use of health data. The conference will discuss the importance of technological interoperability, standards, trust frameworks, and cross-sector collaboration to create a more resilient and inclusive healthcare ecosystem.

The three-day conference promises to serve as a platform for dialogue and action, bringing together policymakers, insurers, healthcare providers, tech innovators, and experts to explore emerging models, share case studies, and chart a practical path forward. A stakeholder consortium will be formed following the conference to work on an actionable financing and data framework for Malaysia. Attendees are encouraged to use this opportunity not only for knowledge exchange but to forge new partnerships and contribute to a patient-centric, data-driven health system in Malaysia and beyond.

WELCOME MESSAGE

It is my great pleasure to welcome you to the Digital Health Malaysia Conference 2025 (DHM 2025). This year's conference will bring together policymakers, regulators, insurers, technology providers, and data governance experts to provide an actionable framework for data sharing and interoperability. The initiative aims to harmonize standards, establish robust governance mechanisms, and promote scalable solutions that enable the exchange of trusted data across sectors and jurisdictions.

Through a keynote address, technical panels, and collaborative symposia, participants will address:

- The development of shared data and interoperability standards;
- Regulatory and policy frameworks enabling secure data sharing;
- Architecture for a cross-sectoral insurance data platform;
- Case studies and early use cases demonstrating practical implementation;
- Challenges and opportunities in aligning diverse stakeholders.

The conference will set the stage for a coordinated effort to break down data silos, enhance risk intelligence, and enable a more responsive, transparent, and inclusive Digital Health ecosystem. By framing a common path forward, the conference supports a future in which data flows responsibly and reliably – across borders, platforms, and institutions.
