WELCOME MESSAGE FROM THE PRESIDENT OF ASIA-PACIFIC FEDERATION FOR CLINICAL BIOCHEMISTRY & LABORATORY MEDICINE

We live in uncertain times, driven by technological change, geopolitical shifts, and ongoing environmental degradation. These have led to pressures on governments and communities to continually review investment and national budgets. As current or future leaders in laboratory medicine, it is our role to maintain our awareness of these issues, continually identify where they may impact our professional practice, and implement those changes to provide greater value, both economic and patient outcomes, to our countries.

Where do we find this knowledge that is accessible, accurate and presented to us in a relevant form? It is by attending selective meetings where the content has been specifically curated to provide us with that knowledge, from leading experts in our field.

This forthcoming Congress, with the theme "Scientific Advances and Innovations: Embracing the Challenges of Laboratory Medicine", meets those objectives.

The topics range from pre-conference workshops covering very specific issues to develop bench techniques, to symposia that address topics such as AI, Newborn screening, decision support, managing networks, sustainability, and patient safety.

However, acquiring knowledge is only part of the journey to lead change. We all need strong professional networks we can call on when we need assistance or advice. That is the benefit of attending a Congress of your peers. Discussing common problems often leads to better solutions than we can produce alone.

So join your professional community in Kuala Lumpur in October 2027 to learn from experts, meet colleagues and enjoy the generous hospitality of our Malaysian hosts.

Warm regards,

Professor Tony Badrick
President
Asia-Pacific Federation for Clinical Biochemistry and Laboratory Medicine (APFCB)
