

TITANUS Embedded X-Series

The **TITANUS Lite X Series** NVR system providing high performance video surveillance recording, cutting edge video analytics monitoring and flexible management capabilities for various industries segment include retail, office, manufacturing, residential and more.

Going deep into the TITANUS NVR system, with Intel® HD Graphics integrated into the CPU, the TITANUS NVR system easily handle 8 to 16 channels Megapixel Video CCTV live viewing and recording simultaneously. The lower CPU consumption used by video decoding allow the system for other operation such as remote management by TITANUS i-Doctor.
