

INTELLIGENT VIDEO ANALYTICS

- Improves efficiency & effectiveness of security surveillance
- Filters only relevant events for operators to take immediate actions
- Runs 24/7 without down time
- Work together with live video feed to minimize false alarm

Object Counting

Object Counting provides bi-directional counting of objects under the surveillance area. It is able to count any moving objects (such as vehicles), people or animals. Intrusion Alarm can be set up to notify the administrator when an object crosses or moves into the defined region.

Intrusion Alert

When any object crosses or is inside the defined region, the alarm will be activated for warning

Unattended Object Detection

The Advanced Unattended Object Detection can generate an alert when any unattended object stays within the camera view. This function can be applied to both the indoor and outdoor environments.

Missing Object Detection

The Advanced Missing Object Detection can generate an alert when any object disappears from the camera view. This function can be applied to both indoor and outdoor environments.

Crowd Detection

Crowd detection is used to generate an alert when a crowd of people gathers in a specified area and exceeds the defined time threshold.
