

A partner in advancing health through digital and data transformation

PATH helps countries and communities reach the unreached by mobilizing multisector partnerships, leveraging broad public health experience, and offering a full range of digital and data capabilities—from strengthening digital architectures to planning for next-generation connected devices.

Strengthening digital and data approaches at all levels

Global

PATH elevates regional, national, and local perspectives to the global arena to drive coordinated investments and collective action.

Regional

PATH builds regional capacity by bringing together like-minded stakeholders to share learnings and strengthen collaboration.

National

PATH partners with countries to build the digital- and data-enabling environment that sparks, scales, and sustains the digitalization of health systems, unlocking better health care.

Local

PATH centers our work on connecting health workers, clients, and systems to ensure that all levels of digital health and data strategies meet the needs of communities.

Where we work

We are a global team of 1,500+, working in 70+ countries.

Digital and data making an impact

70

Every year, automated reporting through the BID Initiative saves health workers in Tanzania over 70 hours—or almost two weeks—that they can allocate to patient care.

\$32M

Digital Square has catalyzed more than US\$32 million to support strong digital health and data tools and systems.

19

Digital Square has invested in 19 digital health global goods that can be used in multiple countries and contexts.

17

The Data Use Partnership has outlined 17 high-priority investments to digitalize Tanzania's national health system.

60M

Visualize No Malaria will help eliminate the threat of malaria for an estimated 60 million at-risk people in six sub-Saharan countries.

Local, national, and regional impact

Zambia's Southern Province

Visualize No Malaria:

- Developed data visualizations that help district health personnel understand where, when, and how to intervene during malaria outbreaks.
- Trained, through PATH and with Zambia's Ministry of Health, more than 3,200 community health workers to track, treat, and report infections.
- Includes now eight technology and services companies working collaboratively.

Tanzania

Data Use Partnership:

- Worked with the government to develop a comprehensive, country-owned investment road map for data systems and data-driven action.
- Supported the government's renewal of the national digital health strategy for 2019 to 2023.
- Leveraged partnerships to develop an enterprise architecture for the health sector to optimize the country's digital health systems.

Vietnam

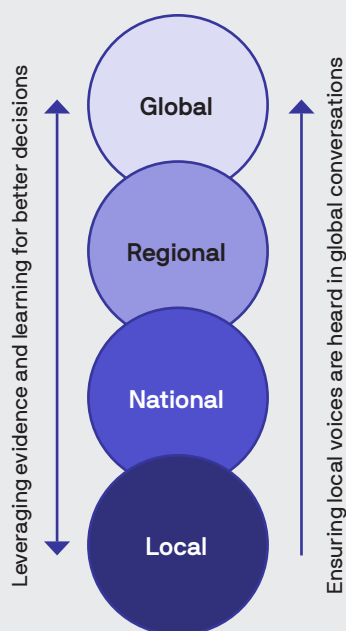

Healthy Markets:

- Promoted health care-seeking behaviors, created dialogue, and shared information on HIV on Facebook to reach more than 240,000 at-risk individuals.
- Developed a Facebook chatbot that provides automated responses to common questions about HIV testing and pre-exposure prophylaxis.
- Partnered with the media company MTV Vietnam and popular apps to share information to millions of users.

Levels of PATH engagement

Connecting global norms with local perspectives. Designing local action with evidence and global standards.

Scaling tools and approaches globally

Case study: Digital Square

Digital Square is a platform that advances alignment in the digital health sector—convening members of the global community to collaborate in order to fund, design, build, and sustain comprehensive digital health systems. Digital Square works with governments to strengthen capacity, with donors to identify new ways to invest, and with partners to advance adaptable, open-source tools. Digital Square aims to strengthen country efforts to develop national digital infrastructure, supported by coordinated investments and a selection of high-quality digital health tools, so that governments and decision-makers can access the information they need, when they need it, to ensure better health data and health outcomes for all.

Engagement at all levels to meet community needs

PATH uses the partnerships and experience we gain through our projects to better understand the unique barriers to digital health and data approaches in communities around the world. We encourage greater coordination at all levels, with country priorities at the heart of any digital or data system. We uphold country leadership, raising the voices of these leaders to inform global policy and strategy, and bring lessons from our targeted implementations to help promising tools and approaches reach national scale. Serving as a common partner to communities, national governments, global policymakers, and the private sector, we are able to advance digital health and data in a way that improves health and well-being for everyone.

PATH is a global organization that works to accelerate health equity by bringing together public institutions, businesses, social enterprises, and investors to solve the world's most pressing health challenges. With expertise in science, health, economics, technology, advocacy, and dozens of other specialties, PATH develops and scales solutions—including vaccines, drugs, devices, diagnostics, and innovative approaches to strengthening health systems worldwide. path.org
