every person counts

Biometrics to Tackle the World's Greatest Impact Challenges

1 billion people lack official forms of ID, barring them from access to essential, life-saving services (World Bank 2019). The inability to accurately identify people costs lives, wastes resources, and prevents millions from escaping poverty.

927,138

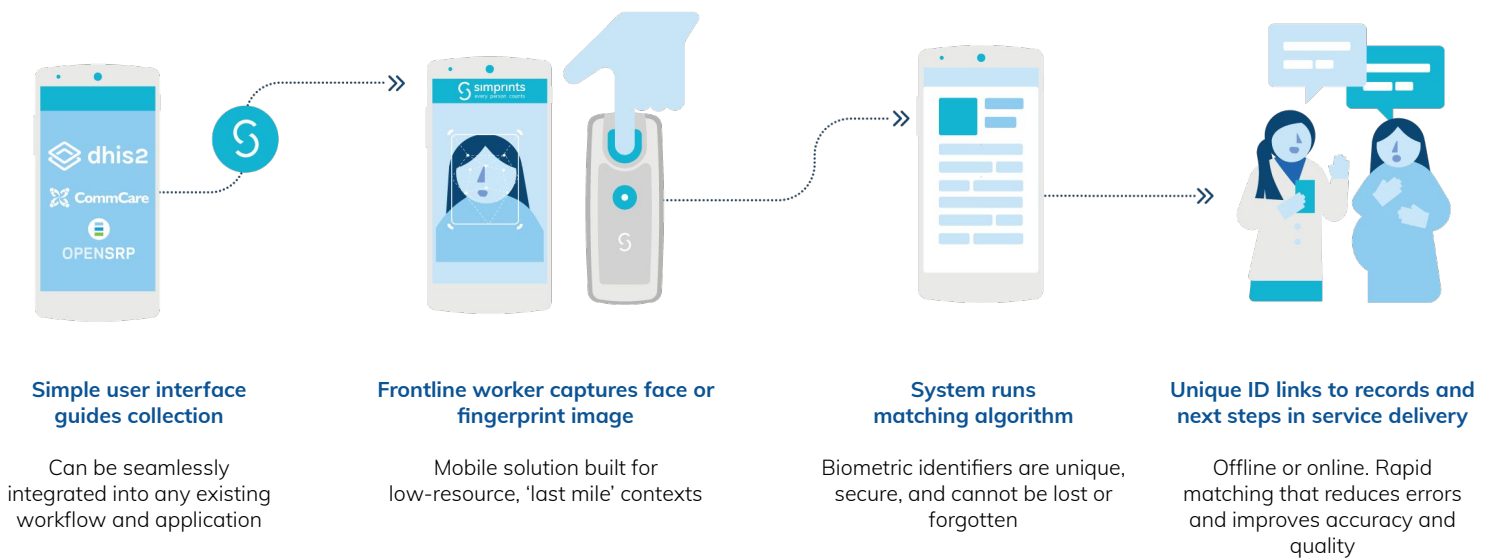

People reached

“Globally, one in four children under age five has no record of their existence...we cannot vaccinate the children who we do not know exist. We need affordable, secure digital identification systems, like Simprints, that can store a child’s medical history, and that can be accessed even in places without reliable electricity.”

Seth Berkley - CEO
Gavi, the Vaccine Alliance

WHAT WE DO

Our mission is to transform the way the world fights poverty. We build technology to radically increase transparency and effectiveness in global development, making sure that every vaccine, every dollar, every public good reaches the people who need them most.

HOW WE'RE UNIQUE

Simprints works across multiple sectors to verify coverage of interventions and ensure every last person is reached.

COVID-19 Response
Every patient is screened, tested, treated, and discharged

Maternal, Newborn, & Child Health
Every mother and child is well cared for during the critical 1,000 days

Neglected Tropical Diseases
Every person living in a high-risk community receives preventive treatment

Cash & Voucher Assistance
Every person receives income for basic needs

Infectious Diseases
Every patient receives full treatment against HIV, tuberculosis, and other infections

Immunisation
Every "zero-dose" child is fully immunised
