# When people everywhere have a path to good health, individuals, communities, and economies thrive.

At PATH, we work to accelerate health equity. Our global team of innovators—scientists, health experts, business leaders, engineers, advocates, and experts in dozens of other specialties—advise and partner with institutions, investors, and businesses of every size to solve the world's most pressing health challenges.

PATH was launched in 1977 by three intrepid researchers who envisioned a new kind of health organization: a nonprofit that would deliver the expertise, resources, and innovations of private industry to improve health for all.

---

**The model we pioneered transformed the way the world thinks about health and development. More than 40 years later, we're still pioneering.**

---

Today, we are harnessing the power of data and digital tools. Defending against new disease threats and epidemics. Creating models to transform health care delivery. And fostering innovation in communities everywhere to bring good health and the jobs and economic stability that come with it—within reach of more people faster.

# Our breadth and depth are unprecedented.

The scope of our work is vast—because the problems we're addressing are huge and complex. Our international team is working in more than 70 countries to transform bold ideas into sustainable solutions that improve health and well-being for all.

As of 2018:

70

PATH works in  
over 70 countries

1,500

1,500 team  
members worldwide

40+

40+ years of  
health innovation

We develop, introduce and advance effective and affordable vaccines, drugs, devices, and diagnostics. And we create new approaches to strengthen global, national, and local health systems to ensure that all these tools reach the people who need them.

Within the last year:

109 million lives impacted

109M

99,000 health care workers trained

99K

270+ advocacy efforts

270+

PATH turns problems into plans.

We specialize in end-to-end solutions to the world's highest-priority health challenges, with a proven approach that sets us apart:

---

#### **Human-centered and evidence-based solutions**

We partner with end users to understand their challenges, context, and health needs—and we use what we learn to define affordable, data-driven, appropriate solutions.

#### **Multisector partnerships**

We forge unexpected partnerships with institutions, investors, and business of all sizes, matching each partner's expertise with our unique strengths to develop, deploy, and scale up innovations that remove roadblocks to health.

#### **Advocacy to overcome barriers**

We work with global and national influencers to advocate for evidence-based policies that drive progress on health. And we work with local organizations to build and support champions for health.

**We take on the world's  
greatest health challenges:**

- Cancer
- Diabetes
- Diarrheal disease
- Early childhood development
- Epidemic preparedness
- Heart disease
- HIV/AIDS
- Human papillomavirus
- Influenza
- Japanese encephalitis
- Malaria
- Maternal and newborn care
- Neglected tropical diseases
- Nutrition
- Sexual and reproductive health
- Tuberculosis
- Water, sanitation, and hygiene

**Through our  
expertise in:**

- Advocacy and policy
- Clinical care
- Community health
- Devices
- Diagnostics
- Digital health
- Drug development and introduction
- Healthy behaviors
- Market development
- Monitoring and evaluation
- Vaccine development and introduction

We're changing the world.

Since the beginning,  
PATH has focused on  
building capacity within  
the regions we serve for  
sustained, large-scale  
results.

# PATH in action

---

## Priming a local manufacturer to fill a critical market gap.

PATH helped Serum Institute of India build the technical capacity to produce high-quality, low-cost vaccines for India and beyond. As the company has grown, so has its economic impact.

## Preparing a nation to take on Ebola.

The Democratic Republic of the Congo embedded a PATH technical advisor in its health ministry to build data-use capacity, a partnership that prepared decision-makers to launch an unprecedented response to a recent Ebola outbreak.

## Rolling out public health initiatives on a global scale.

In concert with the World Health Organization, UNICEF, and dozens of countries, PATH is helping governments build capacity to scale up policies and services that will make interventions to improve early childhood development universal.

**We're blazing a path forward.**

Better health for everyone is good for the world. It opens doors to education and economic stability for individuals and families. It strengthens communities and helps markets grow. It's the foundation of a safer, more just, and more prosperous world.

Good health moves humanity forward.
