Professor Murray Mackay

University of Birmingham

Murray Mackay, OBE, FREng., DSc, is Professor Emeritus of Transport Safety at Birmingham University in England. Until 1995 he was the Head of the Birmingham Accident Research Centre which he formed in 1964. His research themes focused on in-depth crash investigation research, the biomechanics of injuries and vehicle crash performance. He has also worked with the World Health Organisation and a number of national governmental agencies to encourage effective, science-based policies for traffic safety, particularly in developing countries.

He was a founding Board Director of the European Transport Safety Council, Vice-Chairman of the Parliamentary Advisory Council for Transport Safety in the UK, and was President of the International Research Council on the Biomechanics of Impacts (IRCOBI) until 2010. He has written and broadcast widely on traffic safety issues, on vehicle design and crash investigation and the need for a more rational, science-based approach to one of today's major man made diseases. He is a Fellow of the Royal Academy of Engineering, the Royal Society of Arts and Manufacture, the Association for the Advancement of Automotive Medicine and the Society of Automotive Engineers.
